The Easyprox compact keypad is an all-in-one battery powered lock and access control system that is ideal for internal doors. Installing the system is easy because it's not wired into a mains power source. This keypad may also be used with proximity tokens to allow token plus code or PIN.

The Easyprox compact keypad is supplied with everything needed to secure one door, including a tubular mortice latch. Easyprox compact is battery powered and does not require mains power. Installation is very cost effective and creates minimal disruption as no cable is required to communicate between doors and there is no need to wire into mains. The Easyprox compact keypad benefits from unique ease of installation and configuration - no knowledge of networks is required.

If using code or PIN simply enter the number and the door will unlock. If using token plus code or pin, press the power button to "wake up" the unit, present the token then enter the code or PIN.
