

# ATM SAFE security™

## PLUSLOCKS™

### Physical ATM Attacks

With over 20 years experience in the ATM Security business, we are close to seeing every variation of physical ATM attack so far! Our products are designed and manufactured using our combined knowledge, from investigating physical attacks, to ATM recoveries, project management, product design and testing and not forgetting covert monitoring, guarding and alarm development and installations.

Organised crime has been the biggest threat to the ATM industry. Generally the UL safe is the weakest link and once the criminal has perfected their modus operandi and targeted your ATM or Bank branch, then it's only a matter of minutes before your ATM has been breached and the cash stolen.

Like all the very best security products, our Plus Locks keep your ATM-SAFE by removing the time and easy opportunity that the criminal gangs expect to have with your ATM.

## PLUS LOCKS security™

### The key Points

- ✓ Cost Effective
- ✓ Physical attack protection
- ✓ Grinder, Oxy Torch and Drill protection
- ✓ Advanced CNC manufacturing
- ✓ Fits All ATM models
- ✓ Fast installation
- ✓ Self installation
- ✓ Service partner installation
- ✓ Perfect for bringing UL Safes up to a higher standard
- ✓ Retro or factory fit
- ✓ Safe & Vault Guaranteed Quality
- ✓ Designed and manufactured in the UK

### The Technology

**Plus Lock 1** - Active secondary safe lock (driven from the operating lock) provides 24/7 protection against lock drilling, grinder and oxy/acetylene cutting of the lock.

When the lock is closed, the PlusLOCK™ 1 is activated!

**Plus Lock 2** - Mountable relocker safe lock (active when under attack) provides back up protection against grinder and oxy/acetylene attacks on the safe locking bolt mechanism.

The PlusLOCK™ 2 activates when under physical attack.

**Plus Lock 3** – Our new innovative bolt work operated locking system, providing new vertical top and bottom locking positions.

When the lock is closed, the PlusLOCK™ 3 is activated in the vertical locking positions.

**Custom Plus Lock** - Safe relocking systems can be custom designed and manufactured to meet the customers exact protection requirements for all ATM makes and models.

**Chubb safes**  
Trusted the world over.
