

SafeCash Counter Deposit

Simplicity meets security in cash depositing

Imagine a simple and secure cash deposit system offering quick and easy installation designed with your small retail outlet in mind. Every year, the number of cash transactions increases, and business owners and managers require more efficient cash-handling processes to manage them. Meanwhile, security risks are growing, and small businesses need to protect themselves from the costs and risks of robbery.

The SafeCash Counter Deposit is an entry-level front-office solution designed specifically for the needs of your small business. Focused on simplicity and security, the unit is ideal for point-of-sale and under-counter installation. This automated machine is so easy to use; your retail staff can complete routine deposits without supervision and feel safer with less exposure to cash.

SafeCash Counter Deposit

Simplicity meets security in cash depositing

Flexibility and convenience for automated cash processing

Take advantage of the unit's plug & play system with its hassle-free installation and user-friendly locking interface that can get you fully operational in record time. Once installed, simply insert bundles of up to 50 notes, which are instantly registered, counted and deposited. With manual note counting and verification a thing of the past, you'll free up time to run and grow your business, and save money on staffing costs.

Monitor your money in real time

Enjoy the convenience and flexibility of same-day credit. When your retail staff makes deposits, the amount registered is automatically credited to your bank account within the same business day. With Gunnebo's CashControl web-based monitoring software, you'll always know the machine's cash level in real time, ensuring transaction transparency at all times.

The choice is yours

Choose monitoring software that is hosted locally or centrally, by Gunnebo or your retail outlet. If you like, you can grant access to cash-in-transit (CIT) partners, greatly optimising your planning and pick-up processes. Gunnebo's service centre can also monitor your machines remotely to ensure ongoing maintenance and updates before a problem occurs.

Top-of-the-line security

The SafeCash Counted Deposit Unit is equipped with the GSL 1000 high-security electronic lock, approved by ECB•S and A2P (Grade B and C) and VdS (class II and III). The GSL 1000 can be used as a stand-alone unit, with one-time codes or as part of a network, offering the management and control of a fleet of locks.

BENEFITS AT A GLANCE

- 1–2 cash tills available
- High-security electronic lock, approved by ECB•S and A2P (Grade B and C) and VdS (class II and III)
- Front-office, under-the-counter solution
