Cash handling: here to stay

For retailers, the cash-handling market has grown and developed at a tremendous pace over the last decade. Every year, despite the emergence of new electronic payment methods, more and more consumers are turning to cash for their purchases because it provides for fast and instant payment.

In fact, many retailers including supermarkets and big box stores are under increased pressure to process large volumes of cash every day. As a result, they require a simple and efficient cash-handling solution that enhances security, lowers costs and improves productivity.

*Focus on specific
cash-handling
challenges*

Security risks

Large amounts of cash on site leave retailers vulnerable to robbery.

Lost time

Cash reconciliation takes time, often at the expense of sales and customer service.

Shrinkage

Employee theft, shoplifting, administrative error and vendor fraud as a result of inefficient cash-handling procedures all contribute to retail shrinkage.

High costs

Back-office administration represents nearly 3/4 of total cash-handling costs.

One compact solution for large-quantity cash handling

Ideal for retailers managing large volumes of notes and coins, the SafeCash Recycler is a complete self-service cash-handling solution in one compact terminal. You can deposit and withdraw notes and coins at your convenience, simplifying your cash-handling cycle for cash-in and cash-out transactions.

Immediate benefits

1. **Increased security and theft protection** via storage in a VdS-certified safe
2. **Reduced handling risk**, as all cash movements are recorded by CashControl software
3. **Time savings** via simplified cash register opening and balancing
4. **Cost savings** through improved collection planning
5. **Better cash flow management**, as reconciliation is immediately credited to your account upon payment into the overflow cassette
6. **No manual paperwork** required

SafeCash Recycler in action

Gunnebo is a global leader in cash-handling solutions and services for businesses worldwide. Our cash-handling solutions manage over €100 billion each year. The SafeCash Recycler was designed to fully equip retail staff with tills that can be restocked during the day and reconciled in the evening with speed and accuracy.

Step 1: Issuing

Depending on authorisation, equip your cash registers with notes [®]in pre-set or freely selected denominations.

Step 2: Restocking

Replenish your tills according to pre-set individual limits. Notes are stored in a VdS-certified safe to protect from theft.

Step 3: Depositing

Insert bundles of up to 200 banknotes, which are then automatically sorted, authenticated, fitness-tested and stacked in recycling cassettes. This efficient cash-handling cycle greatly reduces processing time. A receipt is issued for each deposit.

Step 4: Monitoring

Use the CashControl software to enable user administration and reporting, making inventory and pick-ups more efficient and economical. Connect to your entire network of self-service machines using the single web-based SafeControl portal. Then, instantly review all deposit information, including time, location and amount, and the number of machines currently in service or reporting a fault.

Technical data

Availability	24/7
Operation	frontload, staff-operated
Dimensions	1620 x 536 x 750 mm
Weight	750 kg
Communication	TCP/IP, RS232, USB
Cassette capacity	5 banknote cassettes containing 2,200–2,500 notes
Safe resistance grade	CEN III with optional CEN IV CashControl software

At a glance

Accessibility: compliant for the physically and visually impaired

Operation modes: configuration as a pure cash-in or cash-out terminal, combined cash-in/cash-out terminal, or full recycler, or to carry out denomination exchanges

Advanced user interface: multi-language touchscreen that guides users through the transaction from start to finish

Counterfeit rejection: optical, ultraviolet, infrared and magnetic are some of the sensors that identify counterfeit and poor quality notes

Sidecars: coin recycling, high-volume coin deposit and envelope deposit sidecars that extend functionality

Security: a seismic detector available
